

# Medley of colours – An eclectic home at Asset versatile

The apartment K2L2 at Asset Versatile is unique in all senses. One glance at the main door and you know this home must be different even before entering it.

Asset Interiors/customization team has transformed this 4-BHK combined apartment into a luxurious, colourful and an eclectic designer home.

## Entrance Foyer and Living Room

The entrance of the home is designed using the luxurious gold colour and CnC pattern all over. The foyer leads up to the main living room which is artistically designed taking inspiration from the crystalline structure of a honeycomb. The TV unit and the shelves are a combination of alternating black and white laminates giving an illusion of movement.

## Dining area and Kitchen

The kitchen in this house is undeniably the focal point.

It is bright, white, modern, sleek and streamlined.

The kitchen opens up to the dining room, an unique turquoise blue paint adorns the dining room wall and blends perfectly with the white colour scheme of the kitchen.

## Bedrooms

The master bedroom in this home has a separate lounge area adjacent to it. The wardrobe which acts as a separator between the bedroom and the lounge room has creatively installed mirror work on one of its side. The headboard wall in the master bedroom is done in faux leather upholstery. All the other rooms of the house are also designed uniquely. The wardrobes, wall fittings are all custom made suiting the client preferences.

As we go in print with this issue of Asset inspirations the homeowner of K2L2, an accomplished doctor is busy with crucial COVID duties. We respect his unwavering service and need for privacy in such difficult times.
